01

PROFESSIONAL PROFILE

Goal-oriented Full-Stack Developer proficient in PHP and Python, specializing in building responsive web applications and automated management systems (Billing & Cafe Management). Proven ability to design scalable backend architectures and user-centric interfaces that streamline business operations and enhance digital efficiency. Though I have not pushed my projects in HTML CSS PHP to git hub but I will push that project earlier as possible as.

02

EDUCATION

Bachelor of Computer Application (BCA), Shivaji University, Kolhapur (Graduated 2025)
Actively pursuing MCA I year in KIT's IMER Kolhapur an Autonomous Institute to deepen expertise in full-stack development and advanced database systems.

03

EXPERIENCE

Billing Management System | Python (Tkinter)

- Developed a Python-based application to automate invoicing and record-keeping, ensuring data accuracy and improving transaction speed.

Cafe Management System | Python

- Created an end-to-end management tool for order processing and inventory tracking, featuring a user-friendly interface for staff operations

04

INTEREST

- 🚀 Learning MongoDB & NoSQL databases
- 🤝 Networking & collaborating with developers
- 🎬 Watching movies, traveling, meditation
